

## Needle-free Injection: Acceptance & Preference Study #6 – Q4 2014

Influenza vaccinations were given to patients during a flu campaign in November/December 2014 sponsored by the **Naval Health Research Center (NHRC)** in San Diego, CA. Those who chose injection by needle-free injector were asked to fill out a survey of their experience. **191 people responded to survey questions.**

Responses were overwhelmingly positive for the PharmaJet Stratis® Needle-free injector for delivery of their seasonal flu shot. **92% indicated they would choose PharmaJet needle-free injection for their next flu shot.**

*PharmaJet, Inc. (2014) "61-10198 Post Market Surveillance – Naval Health Research Center Flu Campaign", internal company report, February 2015.*
